Dear Eva,

Just a few lines to thank you for giving us such a wonderful Farewell Party. I am sorry to be so late in doing this but well — things have been rather hectic! Both George and I enjoyed ourselves immensely and I know what a lot of work and thought Maria, Shirley and yourself put into arranging the party. Please convey our thanks to Maria and Shirley and anyone else who helped you.

Well we are settling into our new life over here rather well. We were very confused the first few days but have straightened out now we have our own place and a few sticks of furniture. I am still washing by hand so we haven't been able to locate a suitable used appliance store yet to buy a washing machine. I will be very pleased when we do as Foster was an alarming number of nappies! We found disposable ones too expensive for our limited budget.

George seems to be taking to academic life O.K. He is keeping up to date with his reading etc so he won't have to rush at the end.

The trees here are very beautiful at the moment as they are changing colour. We are rather taken with the squirrels which run everywhere. There are two large apple trees in our back yard and the squirrels are running up and down them all day.

Please remember me to your mother-in-law and tell her we are making good use of her booties.

I have joined the Dames Baby-sitting Club and we are hopeful of using them on Friday night as we would like to go to a welcome for foreign students at MIT.

I hope Andrew and Rebecca are well, also yourself. We are all well and Melinda is just about driving me

FIRST FOLD

mad as she has no one to play with!

Kirsten is doing fine and laughs a lot. She seems to be a very happy baby.

Well I will say Cheerio for now and thank-you again.

Yours faithfully,

Lila.
