

GC 1960

Regionalism works

French example - Provincial Regional Bureaux.

Iran example British Reg Ec Councils Prefect Reg Dev Board

Weissman, Kondracki - city centered regions

decent admin gives decision making
at regional level - decisions to
develop local areas, even
away from reg. admin
cap.

Woolmington correct.

This is the kind of state dev. plan

I was talking over. Commonwealth partcip.
needed - Only big quick efforts will work to reduce
Sydney.

63 Canberra's signif - Tamworth Allawong
Wodonga
Portland

hinge Nentzo 1964 - Vernon Ctee.

Why has Aust not decentralised
admin on French, English or
European or Canadian pattern?

big states,
little LGAs.

this dichotomy
hampers dev.
outside Sydney.

institutional inertia?
or shortage of
administrators
or the accusation
of Sydney based
public + private
domination.

Commonwealth participation

2nd half 20th centuries - changes.

- ① proportions of labor + capital
- ② travel times
- ③ proportions of prim sec + tert components of wf.
- ④ all subsumed under economies of agglomeration.

more industries are oriented to markets, labor, & technology skills availability ^{good}.
more people oriented to areas of ^{climate, leisure opportunities}
~~metropolis~~

This points to continued metrop region growth, spreading along coastline.

∴ inevitable that many or most smaller service centres, mining towns, transport functions, have & will continue to disappear, & only a few selected, specialised urban places can be 'developed'.

Nat. plan
needed
for
resource
dev. &
allocation,
* pop
disturb &
urban
hierarchies.

Others will remain stable of course but we need State Plan for

① those to be left alone

② " " phased out through relocation & retraining

③ those to be 'developed' selected as specialised 'growth points'

Min of D&D has begun to recognise this.

Criteria for selecting growth points: -

Specialisation in function: -

may combine {

- ① tourism - retirement
- ② admin (State, Muni Shire (amalgamate) social cultural educational sporting centres - festivals?

③ rural regional service centres
transportation, storage &
distribution centres.

④ major industrial manufacturing
agglomerations - either
(b) State specialised like Port Kembla
(a) or Aust specialised like Canberra
(c) or regional specialised like
Tamworth.

Then ~~see~~ concentrate investment
then see who may get hurt &
begin salvage, rehab, reloc + retrain.

∴ each Munic. Shire should

(a) be realistic about its function

+ purpose
+ objectives.

if to be
dev^d at all

or statelised

(b) institute stat. ~~research~~ analysis,

(c) " process of participation
galvanise all interest
groups

planners act as catalysts.

Objectives set.

Methods then devised.

Implementation.

Continuing management

if statelised
then improve
quality of
life only
